

Proposal for Postgraduate Fellowship Programs (Post MD/MS)

1. Introduction

With the rapid advancement of medical science and the increasing demand for super-specialized healthcare services, there is a growing need for structured fellowship programs following MD/MS qualifications. These fellowships aim to provide advanced clinical training, procedural expertise, and research exposure in high-demand subspecialties.

2. Objectives

- To enhance super-specialty clinical skills in emerging and advanced medical fields
- To provide hands-on training in interventional and minimally invasive techniques
- To improve patient outcomes through specialized care
- To develop academic and research capabilities among postgraduate doctors

3. Proposed Fellowship Programs

A. Interventional Specialties

- Interventional Radiology
- Interventional Cardiology
- Interventional Neurology
- Interventional Pain Medicine
- Interventional Anesthesiology

B. Surgical Specialties

- Breast Surgery
- Head and Neck Surgery
- Spine Surgery
- Neurosurgery
- Plastic & Reconstructive Surgery
- Robotic Knee Replacement Surgery
- Surgical Gastroenterology & Liver Diseases
- Liver Transplantation

C. Medical Super-Specialties

- Critical Care Medicine
- Endocrinology

- Reproductive Medicine
- Medical Gastroenterology
- Medical Oncology
- Medical Nephrology

D. Oncology & Advanced Care

- Surgical Oncology
- Medical Oncology

E. Rehabilitation & Sports Medicine

- Sports Medicine
- Robotic-Assisted Rehabilitation

4. Program Structure

Duration: 1–2 years (depending on specialty)

Eligibility: MD/MS/DNB in relevant specialty

Training Components:

- Clinical rotations
- Hands-on procedural training
- Academic teaching sessions
